

Gender Pay Gap Report

Reporting Date: April 2022

Brayleys

Measurement.

Brayleys Cars Limited employs more than 250 people so we are required by law to carry out Gender Pay Reporting under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017, and to publish an annual gender pay gap report.

At the time of the reporting period (April 2022), Brayleys Cars Limited employed 271 “relevant employees” of which 244 were “full-pay relevant employees”

The figures reported are based upon six calculations set out in the regulations that must be reported every year. These show the difference between the average earnings of men and women employed in our organisation.

We are required to publish these results on our own website and a government website, and the following report is based on a snapshot date of the 5th April 2022.

Understanding the gender pay gap.

Using the calculations prescribed in the gender pay gap reporting regulations, we have taken pay data for all of our staff, which includes many different roles and therefore a variety of rates of pay.

Mean = **the average**
Median = **the mid point in a range of numbers**

What is included in our calculations?

Calculations are required to be based on the pay from April each year, including ordinary pay (which includes basic pay/holiday pay/allowances) and bonus pay (profit share bonus/commission payments)

What is the gender pay gap?

A gender pay gap is a measure of the difference in the average pay of men and women – regardless of the work they do – across an organisation, business sector, industry or the economy as a whole. It is affected by the number of men and women across all roles.

It is different from an equal pay comparison, which is a direct comparison between men and women carrying out the same, similar or equivalent work.

Understanding.

The automotive retail sector has historically been a male dominated industry in respect of its workforce, which is changing slowly and we are committed to try to ensure we have a fair representation of men and women.

Our current employee gender split is 79% male and 21% female.

The reality of situation is that a large proportion of our workforce is male and they hold a large percentage of the higher paying roles which is the major cause of our gender pay gap.

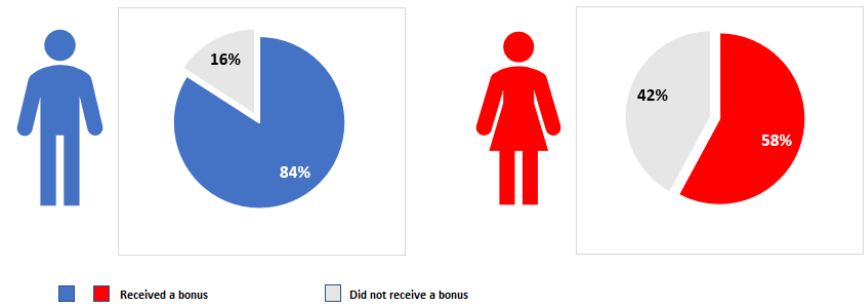

However, we have seen improvements in the % of females in each of the Salary Quartiles and an 11% increase in the number of female staff receiving a bonus, over the last 12 months

The Gender Pay Gap data for Brayleys Cars Limited in 2021/22 is as follows:

MEAN AND MEDIAN PAY AND BONUS GAP		
	MEAN (average)	MEDIAN (middle)
Gender Pay Gap	26.9%	13.3%
Gender Bonus Gap	59.0%	45.9%

BONUS.

The proportion of males/females who received a bonus is as follows:

SALARY QUARTILES.

The proportion of males/females in each quartile pay band is as follows:

Actions.

How are we working to address the gap?

We are committed to equal pay. Where male and female employees undertake the same role and responsibilities, they have the exact same opportunity to earn equal pay. We operate consistent group wide pay structures for many common roles to facilitate this.

We believe the group's values promote a working environment which is conducive to both male and female employees. We are open to job applications from applicants of all diversities and are committed to offering equal opportunity to both male and female job applicants across all roles.

We have actively removed gender bias in our recruitment advertising, and all recruitment applicant have gender clues removed before being seen by hiring managers to prevent unconscious biases and allow the best applicants to be selected.

Our membership of the Automotive 30% Club continues to provide expertise in ways to address gender & representation imbalances across our business. For example, we have introduced enhanced maternity pay to support employees during this break in their careers.

To achieve our aim of 30% of senior leadership positions being held by women by 2030, it is important that the groups current recruitment and retention strategies must continually develop to remain attractive to the new recruits of today, who can develop into the senior leaders of tomorrow.

However, we are also aware that the level of staff turnover within senior leadership positions in the company occur less frequently than other more common roles such as sales executives and technicians who currently account for more than 50% of employees.

In reflecting the diverse nature of the communities we serve and widening the reach of our business recruitment into these groups, we believe will lead to better gender and diversity representation in our workforce

We want to attract and recruit the very best talent into our business, regardless of gender and are committed to being an inclusive and diverse employer.

I confirm that these published figures are an accurate account of our gender pay gap as at April 2022.
